QVIS

LED LIGHTING

QVIS Lighting, now approaching its seventh year as a recognised luminaire manufacturer, continues to grow through innovation, depth of range and customer loyalty. As well as being a member of the Lighting Industry Association (LIA), The Manufacturers' Organisation (MAKE) and Philips Enabled LED Licensing Program, QVIS is also an ISO 9001:2015 registered company. Through its high level of service and support, the QVIS brand installs trust in the competence to design, supply and service for the life of the project, well beyond its install. A focus on specification and value engineering ensures QVIS offers lighting solutions across all major sectors with minimal lead time and equal or superior product specifications.

Fully equipped with the latest in LED technology, QVIS is established as an affordable brand that doesn't compromise on quality and performance. QVIS is committed to incorporating reputable component manufacturers who guarantee long life and serviceability on their product lines.

Sustainability is important to QVIS, as it is for our customers. We focus on ensuring energy efficiency across our range of fully integrated LED luminaires, which have a proven record of high performance and longevity. Suitable across a wide range of sectors, including but not limited to: commercial, health, industrial, retail and education sector, we offer the flexibility of interchanging drivers on request. With conventional 1-10V, Switch Dim and DALI options, along with the latest in Bluetooth and Wireless communication, QVIS offer dimmable solutions for lighting control requirements, assisting in energy saving, building sustainability performance and in turn, a reduction in carbon footprint.

In order to further enhance its growing reputation and brand recognition within the UK, QVIS has acquired lighting specialists from some of the biggest manufacturers in Europe and partnered with market leading component and solution providers. Utilising their wealth of knowledge and expertise in design, supply and implementation, QVIS gain a full understanding of their customer's project needs and requirements.

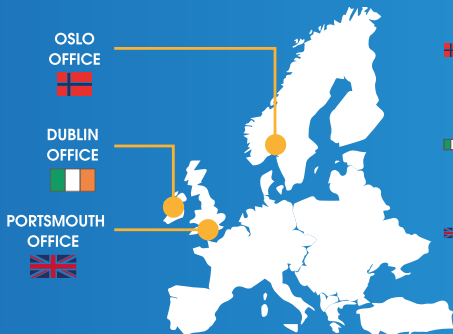

In 2019, ADATA companies: QVIS lighting and OYN-X merged to offer our wholesale partners both lighting and security. It is not only the synergy of these companies that led to the merge, but also the enhanced customer service and offering that would ensue. With a range of premium Security and CCTV products now added to the range, the exceptional quality and reliability that QVIS customers have experienced now extends beyond lighting.

The QVIS customer base and market coverage has grown exponentially and continues on this trajectory, while investment in an ever expanding product range and sales support will continue to give QVIS Lighting and Security customers peace of mind.

4PX Warehouse

 London, UK

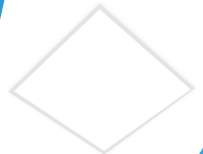

Our NCF vapour-proof linear fittings are built for industrial use, with Tridonic flicker-free drivers and polycarbonate housing giving IP65 dirt & moisture resistance. We installed these fittings throughout the warehouse areas of 4PX's London base and we also provided some Lynx panels for back-areas such as the staff room.

Boardman Bikes

 Evesham, UK

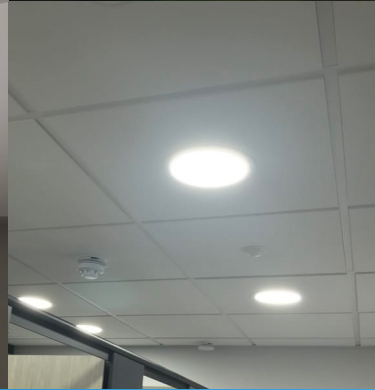

This lighting solution for the Boardman Bikes Performance Center in Evesham is simple, but effective. To suit their warehouse-style ceiling, we used our Lynx 6x6 modular panels with our 4-wire suspension kits - which are made especially for modular panels and can be adjusted to ensure that the panels still look level in the absence of a standard ceiling grid.

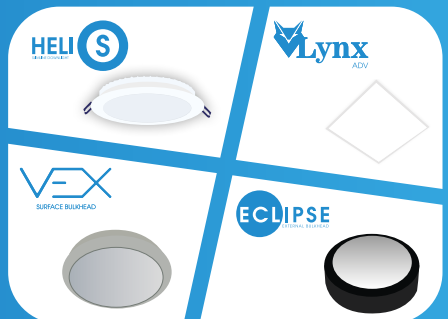

Cams Hill School

Fareham, UK

We provided Cams Hill with various lighting solutions from our diverse product range. Our Lynx panels were used for classroom areas, with Helios downlights used for washrooms and Vex bulkheads for corridors. Additionally, we used our Eclipse bulkheads for the outer walls, which are IK10 impact resistant and IP65 rated, making them ideal for external use.

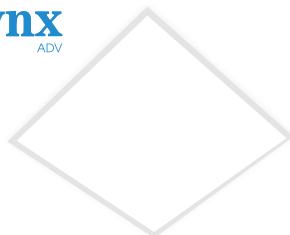

Southern Co-Operative

 Southern UK

We were commissioned by The Southern Co-Operative to update their existing fluorescent lighting to LED panels for better uniformity and longevity, and also lower maintenance and energy costs. Starting with Harbour Parade, Southampton, we provided various stores with our high efficacy Lynx panels with integral emergency for peace of mind

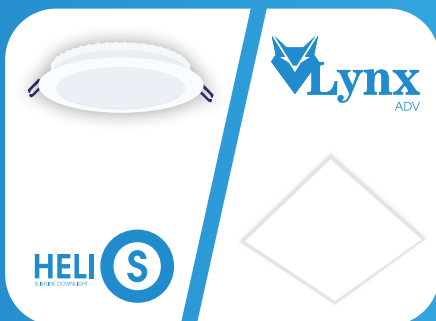

Dick Lovett

 Swindon, UK

For this branch of Dick Lovett, we needed a sleek, professional solution to fit the stylish and minimal look of this office and dealership space. We used our Lynx panels and Helios slimline downlights to provide great light uniformity via the polycarbonate opal diffusers and high-spec Tridonic drivers built in to the fittings.

Eton House

 Maidenhead, UK

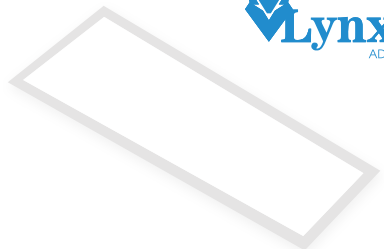

**Knight
Frank** 

(ESTATE AGENT)

For this newly-built office complex based in Maidenhead, we provided our 12x3 Lynx modular panels throughout the building. We used suspension kits as a way of effectively installing the panels despite the non-standard ceiling grid. The panels brightened up the space without compromising on energy efficiency.

 **Lynx**
ADV

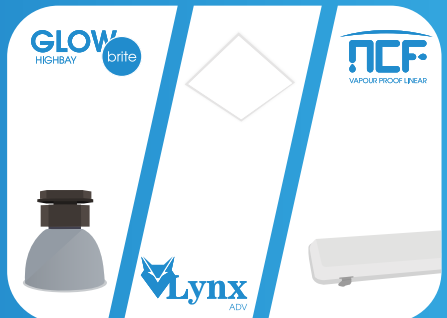

Fabb Sofas

 UK Branches

 **fabb**sofas

For Fabb Sofas, we needed to implement a solution for all branches to suit the high, suspension-based ceilings while still providing a good level of brightness to compliment the colourful, eye catching decor. We used our high-power Glowbrite highbays to achieve this. We also installed LED panels in the staff areas and our NCF fittings for storage rooms.

Flip Out

 Chichester, UK

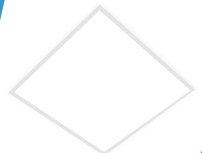

We needed to provide a consistent amount of light to this large, converted warehouse space. The solution we went for was our Glowbrite traditional highbays; suited to large industrial and retail/commercial spaces. We also installed our Lynx 6x6 panels for the staff and reception areas.

Flitwick Leisure

 Bedfordshire, UK

lifestyles
@ flitwick

For this leisure and fitness centre based in Bedfordshire, we needed a lighting solution that would compliment the bright and open space. We used our Helios slimline downlights for the lower ceilings in areas such as corridors and fitting rooms, while in areas with higher ceilings, our high-power Glowbrite highbays were the ideal solution.

HIGHBAY **brite**

HELI
SLIMLINE DOWNLIGHT

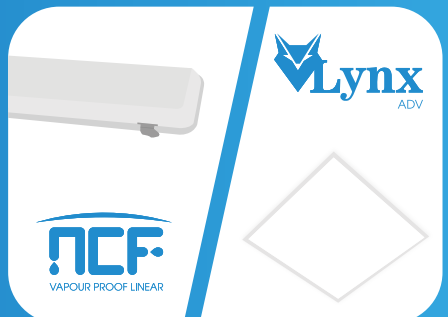

Fratton Park Stadium

 Portsmouth, UK

For our project at Fratton Park, home of Portsmouth Football Club, we used our high efficacy Lynx panels for the lounge and conference spaces as an efficient and professional-looking solution. We also used our vapour proof, IP65 rated NCF linear fittings as a durable solution for external areas such as the entrances and stairwells.

Greenwich College

 London, UK

Greenwich
Community
College

Greenwich Community College wanted light fittings that would suit educational use and create a bright, welcoming environment for their students. We provided our high efficacy LED panels for classrooms, our TP(a) rated Proteus linear fittings for communal areas and our IP66 rated Vex surface wall/ceiling bulkheads for the corridors.

ITD Consultants

 Portsmouth, UK

itd
CONSULTANTS

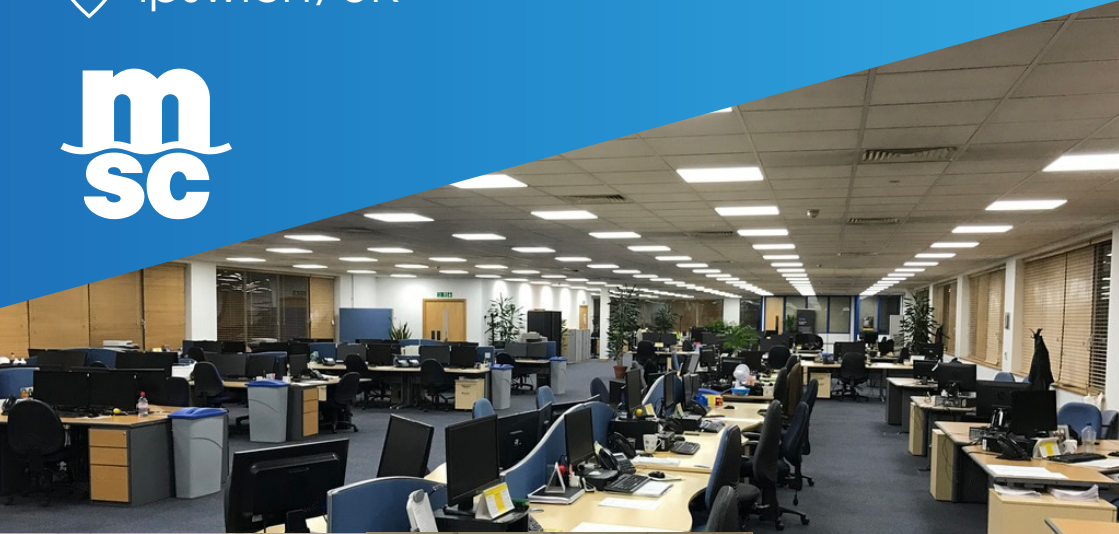

This consultant office in Portsmouth required some new panels with better energy efficiency and reliability, so we provided them with our Lynx panels in 600x600mm sizes to fit their ceiling grids. These panels offer TP(b) and IP44 ratings and are high-spec Tridonic drivers.

 Lynx
ADV

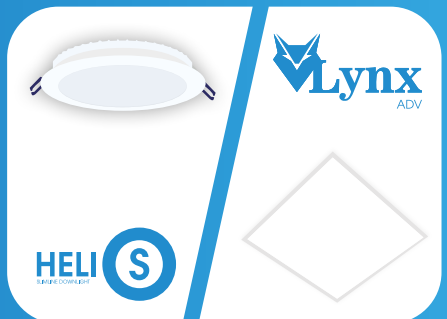

Mediterranean Shipping Co.

 Ipswich, UK

We provided Mediterranean Shipping Co. with our Lynx 6x6 panels for their Ipswich-based office for a professional-looking, consistent lighting solution. We also used our Helios downlights for certain rooms in the building; these downlights have a super-slim profile for minimal void spaces and are rated IP65 and TP(a).

Nissan Warehouse

 Kuwait City, Kuwait

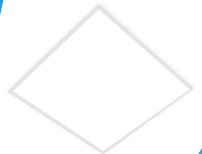

For this project, we installed our super-high efficacy Glow UFO highbays, which are 1-10v dimmable as standard. We also used our Lynx panels for staff and storage areas. This job for one of Nissan's warehouses based in the Middle-East is one of several export projects that we have taken on.

GLOW
HIGHBAY **UFO**

Lynx
ADV

Prime Produce Ltd.

 Tonbridge, UK

For this Kent-based fruit & veg production company, we provided our Lynx 6x6 panels and slimline Helios downlights as a professional, efficient lighting solution for the office and corridor areas. With the warehouse areas, our high-efficacy Glow UFO highbays were the ideal solution.

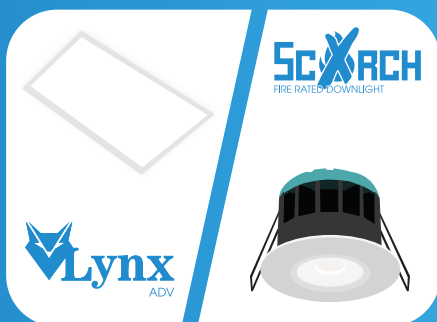

Salisbury Steam Laundry

 Salisbury, UK

SALISBURY
STEAM LAUNDRY

Salisbury Steam Laundry required lighting that was more reliable and energy efficient. We used our Lynx 1200x600mm panels as one lighting solution. We also used our Scorch downlights, which are not only fire-rated to BS476-22 standards (30/60/90 minute), but are also IP65, CCT switchable and include 3 magnetic bezels (white, brushed & polished)

Seat Dealership

 Letchworth, UK

We provided a range of industrial and external light fittings to this Seat car dealership. We used our Glowbrite traditional highbays for the showroom areas, as well as our twin-array Baylite lowbays for warehouse areas. Both of these fittings provide high power, at 150W, and 1P65 protection. To illuminate the building on the outside, we used our QFlood IP66 rated floodlights

Tempus Court

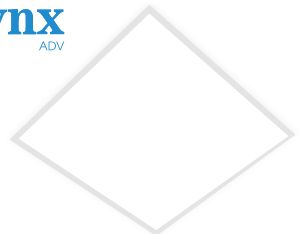

Guildford, UK

tempus
court

This new office building located in Guildford required a fairly large amount of LED panels as a professional looking, energy saving lighting solution. We installed our 600x600mm Lynx panels throughout the complex to provide great light uniformity, high efficacy and peace of mind via the IP44 rating of the panels, as well as TP(b) fire rating.

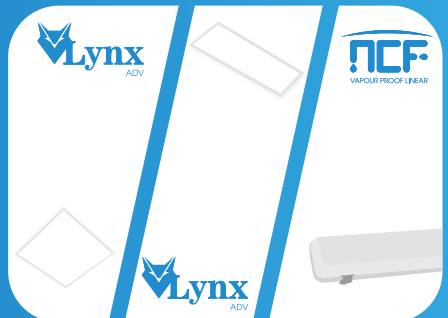

UL Labs HQ

 Basingstoke, UK

This project was based in the customer service center for UL Labs. We provided our Lynx panels in sizes of 6x6 & 12x3 to suit the different ceiling types in the rooms; we provided solutions to fit ceiling grids and also to suit their suspension-based ceilings. For the plant rooms, we used our vapour proof, IP65 rated NCF industrial fittings.
